

CREATE IBM WATSON IOT PLATFORM AND DEVICE

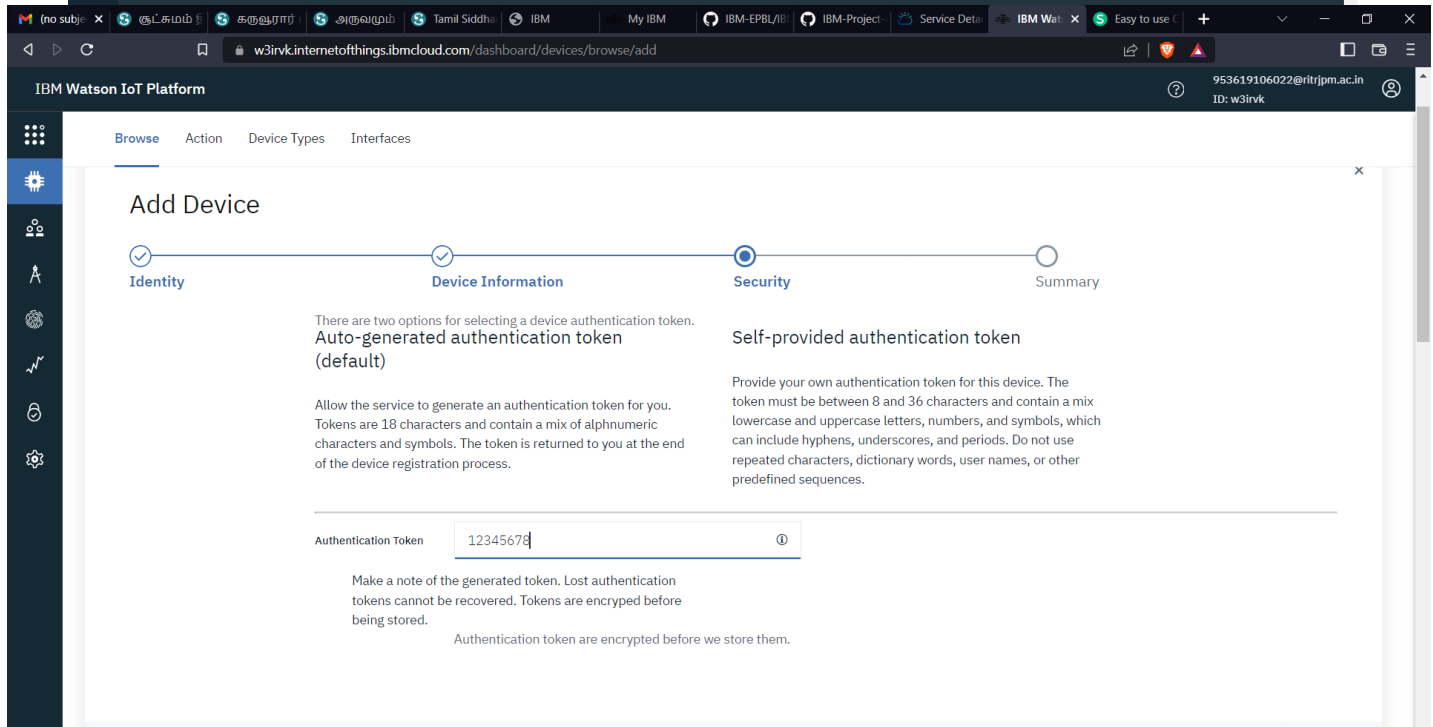

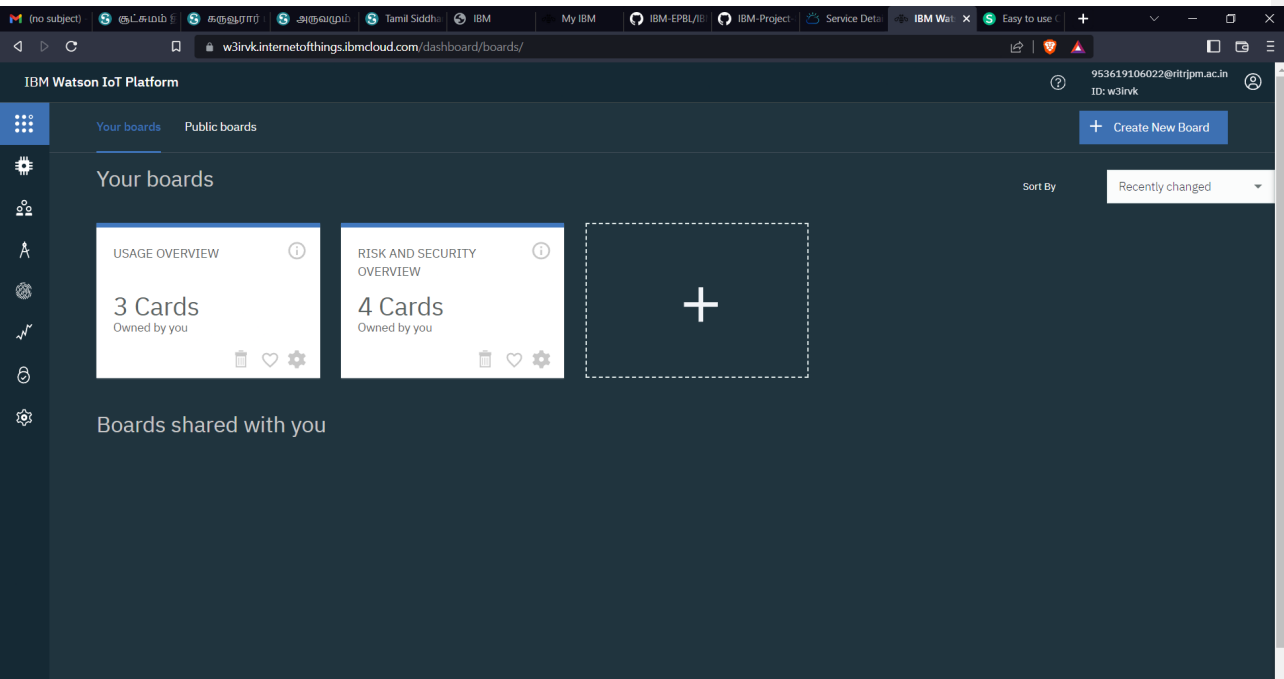

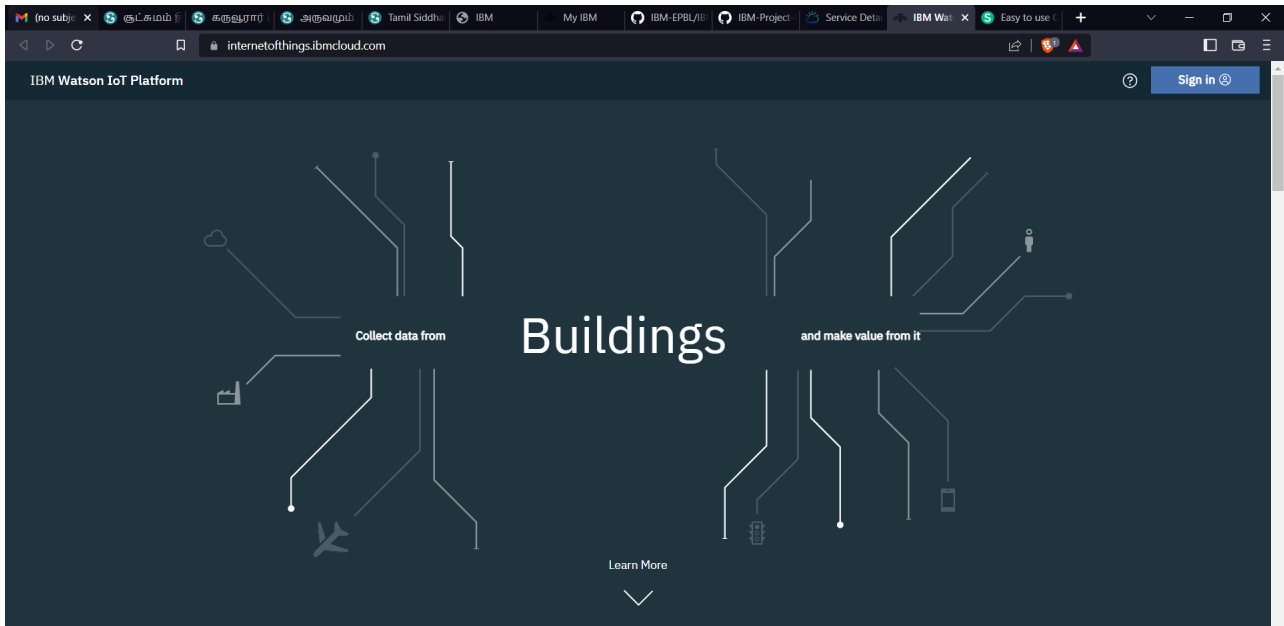

Date:	13 NOVEMBER 2022
Team ID:	PNT2022TMID51059
Project Name:	GAS LEAKAGE MONITORING AND ALERTING SYSTEM FOR INDUSTRIES

The screenshot shows the IBM Cloud Dashboard. The top navigation bar includes the IBM Cloud logo, a search bar, and links for Catalog, Manage, and user profile. The main content area is titled 'Dashboard' and features a 'For you' section with several cards: 'Build' (Explore IBM Cloud with this selection of easy starter tutorials and services), 'Use Cloud Foundry' (Deploy and run your applications without managing servers or clusters with IBM Cloud Foundry), 'Explore IBM Cloud Shell' (Try a command-driven approach for creating, developing, and deploying a web project), 'Create and deploy an application' (Browse our starter kits, and then select one to jump start the process to create and deploy your app), 'Set up your IBM Cloud account' (Learn how to set up your IBM Cloud account, manage your account settings, organize resources, and control access to those resources), and 'Get Started with Watson Studio' (Get started with using AI and Cloud Object Storage in 15 minutes). Below this, there are sections for 'News', 'Recent support cases', 'Planned maintenance', and 'IBM Cloud status'.

The screenshot shows the 'Let's get started with IBM Watson IoT Platform' page. The page is titled 'Internet of Things Platform-t3' and is marked as 'Active'. It features a large graphic of a central node connected to several other nodes. The main heading is 'Let's get started with IBM Watson IoT Platform', followed by the subtext 'Securely connect, control, and manage devices. Quickly build IoT applications that analyze data from the physical world.' Below this, there are 'Launch' and 'Docs' buttons. The page also includes a 'Ready for the next level?' section with the heading 'IBM Watson IoT Platform Journey'. This section lists three options: 'Lite' (The Lite service plan provides a lightweight development environment to get you started with the connectivity capabilities of Watson IoT Platform), 'Non-Production' (The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to see how the service can fit into your IoT environment), and 'Production' (The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data). Each option has a list of features and pricing details.
